About me:

Driven Software Engineering student with hands-on experience building scalable web, mobile, and AI-powered applications using Laravel, React, Node.js, and Flutter. A proactive problem-solver with strong teamwork skills, eager to leverage full-stack capabilities to develop innovative software solutions.

Education:

Bachelor of Software Engineering | 2023 – Present

Metropolitan University, Sylhet

Projects:

1.Employee Management System :

Technologies: Laravel, Vue.js, MySQL

- Developed a full-stack web application featuring an admin dashboard for employee data management and organizational tracking using Laravel and Vue.js with MySQL integration.

2.MoodTracker – Mental Wellness Application

Technologies: React.js, Node.js, MongoDB

- Built a full-stack wellness application featuring daily mood logging, emotional diary tracking, and analytics using React.js and Node.js RESTful APIs backed by MongoDB.

3.FoodScanner – AI Food Safety Analyzer

Technologies: Flutter, Dart, OpenRouter API, Gemini AI, SharedPreferences

- Engineered a cross-platform mobile application using Flutter and Gemini AI via OpenRouter API to deliver instant image-based food safety scores, dual-language assessments (English/Bengali), and local data persistence.

Skills:

- Full-Stack Development: PHP, Laravel, Vue.js, MySQL, Node.js
- Mobile App Development: Flutter, Dart
- Tools: Git, GitHub, VS Code, Node.js, XAMPP
- Professional Skills: Communication, Teamwork, Problem Solving, Time Management
